Riverit Company has provided services in sites and online-stores development, enterprise portals, and CRM systems integration, web-design, and SEO optimization services for over 8 years. Web solutions created in our company are oriented towards improving indicators of our client's business.

WORKUP24 Company main line

Web resource

We will create a unique and qualitative site on the basis of platform Bitrix: Site administration

SEO optimization, support

We will use complex marketing approach and make your site profitable

Enterprise portal, CRM system Bitrix24

We will automatize and optimize you employees' work – fewer mistakes, more efficiency

Accounting systems 1C

We will automatize accounting on the basis of 1C:Enterprise and integrate it with the web-site and other sources of lead

Bitrix benefits:

- download speed from 0.2 sec – your site will be faster, than other ones;
- 1C integration – convenient for accounting and manager work;
- reliability – stability in work with high traffic on the web-site;
- security – high level break-in protection;
- status – representation of your respectability;
- multi-site system – development of several sites on the basis of one product copy;
- easy system management – the system is oriented towards a user without programming knowledge;
- powerful system of statistics and web analytics – allows to analyze advertising and promotion costs;
- freedom of action – you will not be attached to a particular developer;
- constant development – 300 updates per year.
